

SMC MRU Enclosure

For all MRU Ranges

To extend the Motion Reference Unit's lifetime SMC recommend using a protective enclosure during offshore installations. The optional enclosure provides additional protection to the MRU when required.

General

The protective enclosure for the SMC MRU is produced in a corrosive resistant Marine Grade AISI 316L Stainless Steel material. The enclosure is delivered including a terminal list, cable glands mounted in a cable entry flange and a mounting bracket with an adapter for all the SMC Motion Reference Unit ranges.

Environmental

The enclosure size is H500 x W400 x D250mm and has an IP66 rating for water and dust and IK10 for impact force. The enclosure has a weight of 17 kg including the mounting bracket and terminal list but excluding the MRU weight.
